PHOTOGRAPHY

Practicals

- * Practical tests are scored using total points like 48 points out of 50 possible points.
- * There are 2 chances to take the practical test. I will take the more recent score. If are okay with first score then don't need to take the test a second time.

Cloud #3

Target Tests

40% of grade are target tests and lab targets.

They are scored using 4 point scale.

Cloud #4

Re-assessable

Target tests and lab targets are re-testable...
with a different version of the test.

Target test or lab target needs to re-tested within 1 week
of test/work being passed back.

Geology Final

10% of grade... can use notebook or any of own work kept on this test.

Cloud #6

Remember...

This is a hands-on class and participating/practicing in the lab will prepare you well for the tests.

Taking notes also helps...

Cloud #7

How do I re-assess?

- 1) Get test from folder,
- 2) Use notebook/work to correct test,
- 3) Discuss corrections with Ms. Boldt,
- 4) Complete a way of reviewing,
- 5) Take test in reassessment center
(Mr. Munson).

Cloud #8

Assistance

Before or after class works for a couple of questions...

Seminar or after school works better for longer meetings or completing make-up work.
