

Climate: Evidence of Earth's Past

Are these statements correct? Mark **Y** or **N** for each statement. For statements marked "N", rewrite them so they are correct.

1. Natural records of past climate, such as tree rings and coral growth, can tell us what it was like hundreds and even thousands of years ago.
2. Tree rings can be used to tell what the climate was like hundreds of thousands of years ago.
3. Bubbles of trapped air in ice can be analyzed to tell us concentrations of greenhouse gases in the atmosphere at the time the ice formed.
